PETITION TO CORRECT INVENTORSHIP  
PURSUANT TO 37 C.F.R. § 1.48(a)

Assistant Commissioner for Patents  
Washington, D.C. 20231

Sir:

Pursuant to 37 C.F.R. § 1.48(a), inventors Katie A. Thompson, Lyndon M. Foster and Todd C. Peterson, through their undersigned attorneys, hereby request correction of the above-identified patent application Serial No. 08/639,255, to include Nicole Nasby and Paul Brian as co-inventors. Correction is necessary because Nicole Nasby and Paul Brian were omitted as co-inventors through inadvertence and without deceptive intent. The details as to how this error occurred and when it was discovered are set forth in the accompanying Statement of Facts verified by the originally named inventors.

In accordance with 37 C.F.R. § 1.48(a), the following documents are submitted concurrently herewith:

1. A Verified Statements Of Facts In Support of Correction of Inventorship Pursuant To 37 C.F.R. § 1.48(a) executed by Katie A. Thompson, Lyndon M. Foster and Todd C. Peterson, respectively;

# CONFIDENTIAL

2. An executed Supplemental Declaration and Power of Attorney, signed by each of the actual inventors of this application, i.e., Katie A. Thompson, Lyndon M. Foster, Todd C. Peterson, Nicole Nasby and Paul Brian, as required by 37 C.F.R. § 1.63;

3. An executed Consent Of Assignee To Correction Of Inventors in the present application; and

4. A Petition Fee of \$130.00 to accompany the present change of inventorship as set forth in 37 C.F.R. § 1.17(h).

Being submitted concurrently herewith for recordation, is an Assignment of the rights in the above-identified patent application from the co-inventors, Nicole Nasby and Paul Brian, of the instant invention to ChromaXome Corporation. The other co-inventors already assigned their rights to such Company.

According to currently recommended Patent and Trademark Office policy, the Application Processing Division or any other Patent and Trademark Office employee involved in deciding the relief requested is authorized to call the undersigned attorney in the event that the handling and granting of this petition can be expedited.

Respectfully submitted,

**VERIFIED STATEMENT OF FACTS IN SUPPORT OF  
CORRECTION OF INVENTORSHIP PURSUANT TO 37 C.F.R. § 1.48(a)**

Assistant Commissioner for Patents  
Washington, D.C. 20231

Sir:

1. We, Katie A. Thompson, Lyndon M. Foster and Todd C. Peterson, the originally named inventors respectfully request that the inventorship of the above-identified application be corrected to add Nicole Nasby and Paul Brian as co-inventors. Nicole Nasby and Paul Brain were omitted as co-inventors through inadvertence and without deceptive intent. The details as to how this error occurred are set forth below.

2. The present invention, as described and claimed in the above-identified application, resulted from collaboration between us and Nicole Nasby and Paul Brian. The present invention relates to a novel approach of drug discovery that involves the generation of novel metabolic pathways in libraries of genetically engineered cells. The present invention provides methods for making combinatorial gene expression libraries and methods for screening the libraries for the production of novel compounds. The methods of the

# CONFIDENTIAL

invention also encompass production of compounds of interest by selected host organisms.

3. Katie A. Thompson, Lyndon M. Foster and Todd C. Peterson each conceived and reduced to practice the core methodologies for (a) randomly combining genetic material from one or more organisms in a host organism to form combinatorial gene expression libraries; and (b) identifying productive recombinant organisms from such libraries by use of a variety of reporter regimens. The contributions of Nicole Nasby and Paul Brian relate to methodologies that enhance the productivity of the libraries and improve the efficiency of the screening methods.

4. In particular, Nicole Nasby contributed to the conception and reduction to practice of methods that use a semi-solid matrix to encapsulate host organisms containing a combinatorial gene expression library, thereby rendering the host organisms more amenable to manipulations in the laboratory and high throughput screening technologies.

5. Paul Brian contributed to the conception and reduction to practice of the strategy wherein a cosmid library containing DNA from multiple species of donor organisms are pre-screened using hybridization probes containing genes that encode metabolic pathways of interest. DNA prepared from positive clones so identified in the cosmid libraries are pooled and used in making the claimed biased combinatorial gene expression library.

6. At the time of preparing the above-identified application, Attorneys for Applicants were only aware of the contribution of Katie A. Thompson, Lyndon M. Foster, and Todd

# CONFIDENTIAL

C. Peterson to the conception and reduction to practice of the recited gene expression libraries and methods claimed. The inventive contributions of Nicole Nasby and Paul Brian were inadvertently not appreciated, leading, without deceptive intent, to the designation of only Katie A. Thompson, Lyndon M. Foster, and Todd C. Peterson as the joint inventors of the above-identified application.

7. At the time of execution of the Declaration and Power of Attorney on May 28, 1996, the original named inventors, unaware of the legal criteria for inventorship, did not notify Attorneys for Applicants of the precise nature of the contributions of Nicole Nasby and Paul Brian. Thus, the Declaration and Power of Attorney was executed and filed without deceptive intent.

8. The possibility of an error in the named inventors first arose during a series of communications between the Attorneys for Applicants and Katie A. Thompson in the summer of 1996, when Katie A. Thompson informed the attorneys that Nicole Nasby, a member of her laboratory, who worked diligently on the project may have made a contribution that qualified Nicole Nasby as a co-inventor. Attorneys for Applicants diligently began an inventorship analysis to determine what, if any, inventive contribution Nicole Nasby may have made in connection with the subject matter claimed in the instant application. In the course of this investigation, during the fall of 1996, Todd C. Peterson further indicated that Paul Brian, a member of his laboratory, might also qualify as a co-inventor. Communications between the

# CONFIDENTIAL

investigators and the attorneys continued through the end of 1996 in order to complete an analysis of inventorship.

9. The results of the inventorship analysis indicated that Nicole Nasby and Paul Brian each contributed to the conception and reduction to practice of claimed subject matters recited in the pending claims; e.g. Claim 18 and Claim 21. Therefore, Nicole Nasby and Paul Brian should be named as co-inventors of the above-identified application with the originally named inventors, Katie A. Thompson, Lyndon M. Foster and Todd C. Peterson, and our petition to amend inventorship is being diligently pursued.

10. Katie A. Thompson, Lyndon M. Foster and Todd C. Peterson certify the foregoing statements made herein in support of the request to add Nicole Nasby and Paul Brian as co-inventors of the above-identified application, and hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements are made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the above-identified application or any patent issuing thereon.
